

Healthcare Professions

[Explore Catalog](#) [Search Courses](#)

The Lee College Healthcare Professions pathway is for students who plan to complete prerequisites for any allied health programs in the Houston Metropolitan region and beyond.

The courses in this plan will transfer to many colleges and universities for allied health-related selective admissions programs such as Respiratory Care Technology, Ultrasound Technician (Sonography), Physical Therapy Assistant, Pharmacy Technician, etc.

Students should work with their advisors to tailor course selections to align with their chosen allied health program.

What Will I Learn?

The courses in this plan includes common allied health-related prerequisites, such as Anatomy and Physiology, General Psychology, Mathematics, English Composition, as well as the general Texas core curriculum to help prepare a student for success in their chosen allied health program.

What Can I Do with This Course of Study?

Students who complete the courses in this course of study should be prepared to apply to an allied health program after completing prescribed prerequisites in the desired degree plan.
