

Vendors

The Purchasing Department of the Lee College District welcomes the interest of all vendors who are in a position to provide equipment, materials, supplies and services to the college. We believe that the purchasing process is a joint venture between the college and our vendors.

The goal of the Purchasing Department is to involve as many vendors as possible in the college purchasing process while meeting the requirements of State of Texas laws, general college regulations, good business practices, and special requirements adopted from time to time by various agencies from which the college secures funds for special programs. [Minority, women-owned, and small business enterprises](#) are encouraged to become active participants in college purchasing projects through competitive bidding.
